- * No side effects have been associated with the use of this product.
- * If you have specific questions regarding your health, ask your doctor. If you have general questions regarding the product, call us, or send us an email.

What is in this leaflet:

1. General information, usage, clinical studies, and how effective test
2. Before you take Gene-Eden-VIR capsules
3. How to take Gene-Eden-VIR
4. About side effects
5. How to store Gene-Eden-VIR Capsules
6. Further information

1. INGREDIENTS, USAGE, CLINICAL STUDIES, AND TEST

What are the Gene-Eden-VIR ingredients?

The name of your product is Gene-Eden-VIR. Gene-Eden-VIR is a natural, antiviral dietary supplement. The formula of Gene-Eden-VIR includes 100 mg of quercetin, 150 mg of green tea extract, 50 mg of a cinnamon extract, 25 mg of a licorice extract, and 100 mcg of selenium. The formula is patent protected. The selenium is a trace element. The other ingredients are plant extracts. The use of Gene-Eden-VIR is described below.

What is Gene-Eden-VIR used for?

Gene-Eden-VIR is a natural, antiviral dietary supplement used to help the immune system target latent viruses, such as the herpes simplex virus (HSV-1 and HSV-2), human papillomavirus (HPV), hepatitis C (HCV), Epstein Barr Virus (EBV), and the human cytomegalovirus (CMV). Each ingredient and its dose were chosen through a scientific approach. Scientists at polyDNA, the company that invented and patented the formula, scanned thousands of scientific and medical papers published in various medical and scientific journals, and identified the safest and most effective natural ingredients against latent viruses.

How was Gene-Eden-VIR tested in clinical studies?

Yes. Gene-Eden-VIR was tested by Hanan Polansky and Edan Itzkovitz from the Center for the Biology of Chronic Disease (CBCD) in two clinical studies that followed FDA guidelines. The studies showed that Gene-Eden-VIR safely and effectively decreases symptoms in individuals infected by the following viruses, the herpes simplex virus (HSV-1 and HSV-2), the human papillomavirus (HPV), the Epstein Barr Virus (EBV), the human cytomegalovirus (CMV), and the hepatitis C virus (HCV). The clinical studies were published in the peer reviewed medical journal *Pharmacology & Pharmacy*, the first, in a special edition on Advances in Antiviral Drugs. You can read the full study on the *Pharmacology & Pharmacy* website at <http://file.scirp.org/Html/36101.html>.

How can you test your body's reaction to Gene-Eden-VIR?

The scientists at the Center for the Biology of Chronic Disease (CBCD) have developed a scientific, valid, and reliable questionnaire that tests the effect of Gene-Eden-VIR on users of the supplement. The test works best after taking the supplement for at least 3 months. We recommend that you call Lilac Corp and set an appointment for taking the test. The results will tell you, in detail, how your body reacts to the supplement. The test is free of charge.

2. BEFORE YOU TAKE GENE-EDEN-VIR

Do not take Gene-Eden-VIR

- * If you are pregnant. There have been no studies to determine the safety of use during pregnancy.
- * Ask your doctor for advice before taking Gene-Eden-VIR if you intend on breast feeding.

Driving and Using Machines

Gene-Eden-VIR has no influence on the ability to drive or use machinery.

3. HOW TO TAKE GENE-EDEN-VIR

How many capsules should I take?

Take one capsule in the morning, and one capsule in the evening, about twelve (12) hours later. Take the product with food. If your infection is causing severe symptoms, it is recommended to double the dose. In this case, take two capsules in the morning, and two capsules in the evening, about twelve (12) hours later. Take the product with food.

How fast would I see results?

It takes 4-6 weeks from the time you start taking Gene-Eden-VIR to the time you start seeing results. Unlike drugs, the changes with this natural remedy are gradual, and sometimes easily missed. Consider the following quote from the clinical study that was published in the journal *Pharmacology and Pharmacy*, "The results showed that (the Gene-Eden-VIR formula) has a duration effect ($p = 0.044$, $n = 32$), that is, those treated for a longer time reported a larger decrease in their symptoms." Since 1 bottle will last for 1 month, you might need a second bottle to start seeing results. With Gene-Eden-VIR, and many other dietary supplements, you have to be patient.

When can I stop taking Gene-Eden-VIR?

You should not stop taking Gene-Eden-VIR. If you stop, your symptoms may come back. As a natural product that was shown to have no side effects, it is suitable for long term use.

4. POSSIBLE SIDE EFFECTS

To date, there have been no reports of side effects associated with the use of Gene-Eden-VIR.

5. HOW TO STORE GENE-EDEN-VIR

Gene-Eden-VIR should be stored in room temperature, in dry conditions, with the cap tight. Do not use if the seal is broken or missing. Do not use these capsules after their use-by (expiration) date. The expiration date refers to the last day of that month. If the capsules are out of date, return them to Lilac Corp. and, if necessary, obtain some more capsules. The expiration date can be found at the bottom of the product label on each bottle of Gene-Eden-VIR.

Store in the original package to protect from light.

6. FURTHER INFORMATION

What Gene-Eden-VIR capsules look like and the contents of the bottle.

Gene-Eden-VIR is available in bottles, which contain sixty (60) capsules. The appearance of the capsules is: ovoid, clear coating, with yellow-green ingredients.
